

KHUSHEE VASHISHT

AI/ML Engineer | Python Developer | Software Engineer

Mohali, Punjab, India | +91 70025 64925 | khusheevashisht.hs.106.prag@gmail.com

github.com/KhusheeVashisht | portfolio-x5b9.onrender.com | linkedin.com/in/khushee-vashisht

Open to relocation: Netherlands | Sweden | Switzerland | Australia | Remote EU

PROFESSIONAL SUMMARY

Entry-level AI/ML Engineer and Python Developer with hands-on experience building production-deployed full-stack AI applications, REST APIs, and real-time automation systems. Proficient in Python, Machine Learning (Scikit-learn, BERT, T5, Hugging Face), backend development (FastAPI, Node.js), and SQL/NoSQL databases. Strong foundation in Data Structures & Algorithms, OOP, and Software Development Life Cycle. 16 public GitHub repositories spanning ML, NLP, C++/DSA, and full-stack development.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, Java, C, SQL

ML / AI: Scikit-learn, NumPy, Pandas, BERT, T5, Hugging Face Transformers, NLP, Deep Learning (learning: PyTorch, TensorFlow, Generative AI)

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs, JWT Authentication, OAuth 2.0

Databases: MySQL, SQLite, MongoDB, Firebase, MariaDB

Tools & Platforms: Git, GitHub, Docker, Postman, Render, Linux (basic), VS Code, CMake

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Graph Algorithms (BFS/DFS/Dijkstra), System Design, SDLC

PROJECTS

MindPulse — AI Student Wellbeing Platform | Jan 2026 – Present | React, FastAPI, Scikit-learn, Docker, Hugging Face |

github.com/KhusheeVashisht/MindPulse

- Built a full-stack Machine Learning-based student burnout prediction system using a 1M-row dataset, deployed via RESTful APIs with Docker-based containerisation on Render.
- Implemented JWT authentication and a GenAI-driven recommendation system using Hugging Face Transformers, delivering personalised wellness insights through a React frontend.

Navixis — Smart Campus Navigation System | Apr 2026 | C++, Qt6, CMake | github.com/KhusheeVashisht/Navixis

- Developed a graph-based pathfinding system using BFS, DFS, and Dijkstra-style algorithms for optimised route computation across a campus map modelled as a weighted adjacency matrix.
- Designed a modular 6-component architecture with LRU caching, CMake build system, and optimised data structures, demonstrating proficiency in systems programming and algorithm design.

BookHive — AI Book Recommendation System | 2025 | Python, MariaDB, SQL | github.com/KhusheeVashisht/BookHive

- Built a database-driven bookstore management system with full SQL schema design (users, books, rentals, transactions) and a content-based machine learning recommendation engine.
- Integrated DAA sorting and searching algorithms, admin analytics dashboard, and optimised SQL query handling for fast book retrieval and inventory management.

Quetie_MBG — Twitch Queue Management System | Feb 2026 – Present | Python, FastAPI |

github.com/KhusheeVashisht/Quetie_MBG

- Developed a real-time backend system using FastAPI for live stream queue moderation, with role-based access control, admin dashboard, and scalable REST API design deployed to production.

Translator Bot — Real-Time Chat Translation System | Feb 2026 – Present | Python, Twitch API |

github.com/KhusheeVashisht/Translator_Bot

- Built a multilingual real-time chat translation system using Twitch OAuth 2.0, external translation APIs, and token-based authentication for seamless live stream integration.

EDUCATION

Master of Computer Applications (MCA) — Specialization: AI/ML | [Chandigarh University](#) | 2025 – Present | SGPA: 8.53 / 10

Bachelor of Computer Applications (BCA) | [Prajyotish College](#), [Gauhati University](#) | 2022 – 2025 | CGPA: 8.23 / 10 | Ranked 1st in Class

CERTIFICATIONS

NLP, Deep Learning & AI — Infosys Springboard | Cyber Security, Data Science, Robotics & ML — Simplilearn | Reality X Bootcamp (Extended Reality)

ACHIEVEMENTS

1st in BCA 2025, [Prajyotish College](#) | 2nd in Higher Secondary 2022, [Prajyotish College](#) | 16 public GitHub repositories across ML, NLP, C++/DSA, and full-stack projects
